

FRONTEND DEVELOPER

Marco Andres Falotico

PROFILE

Born in Turin on 20/02/1993.

I'm a positive and enthusiastic person with a passion for photography and outdoor sports like snowboarding and surfing.

After working for a year as an environmental engineer, I decided to quit my job and follow my true passion for web development. I also use my creative skills in photography and videography to help businesses enhance their online presence.

Since then, I have gained solid knowledge of HTML, CSS, JavaScript, React JS and GitHub making web development my primary career focus. I've demonstrated strong problem-solving abilities and effective communication skills working in teams.

EXPERIENCES

FRONTEND DEVELOPER

ITHACA SRL | MAR 2025 - PRESENT

- End to end design of responsive web applications using modern JavaScript frameworks and libraries (React.js, Redux, Bootstrap, MapLibre GL JS) with a focus on user experience, UI consistency, and interactive data visualization (WebGIS).
- Integration and management of WMS services, RESTful APIs, and GeoJSON data for real-time geospatial data handling within web environments.
- Continuous performance optimization and application scalability, ensuring clean architecture, maintainability, and cross-browser compatibility.
- Managed version control and collaborative workflows using Git and GitHub, ensuring clean commits, branching strategies, and seamless integration across development environments.
- Delivered high-performance, scalable, and maintainable web architectures through continuous optimization and cross-browser validation. Worked closely with clients, partners, project and program managers, and backend teams to transform Figma mockups into fully functional, production-ready applications, overseeing the entire development lifecycle from design to deployment.

FRONTEND DEVELOPER

BUSINESS CHANGERS | SEPT 2023 - MAR 2025

- Development of public tenders for the "Bandi Online" portal of Regione Lombardia, using JavaScript as the main front-end programming language and SQL for database querying and manipulation.

ENVIRONMENTAL ENGINEER

ITALAMBIENTE SRL | APR 2022 - MAR 2023

- Management of technical and regulatory documentation: drafting and reviewing general and specific Risk Assessment Documents (e.g., chemical, natural events, floods), Environmental Self-Monitoring Plans, emergency plans, acoustic impact assessments with simulations, and site layouts.
- Environmental monitoring and operational support: handling the update process of environmental permits, monitoring site environmental analyses (e.g., drinking water, wastewater, legionella, air), and supporting evacuation drills with related reports.
