

Marco Andres Falotico

Web Developer | Frontend Developer

React · JavaScript · SQL · APIs · Bootstrap · Git

Turin, Italy · falotico93@gmail.com · +39 346 5838828 · marcofalotico.netlify.app

PROFILE

Web Developer with 3+ years of experience building responsive web applications using JavaScript, React, Bootstrap, SQL and API integrations. Currently focused on frontend development, UI implementation, data-driven interfaces and cross-functional collaboration with backend teams, clients and project stakeholders. Strong problem-solving mindset, technical curiosity and motivation to grow within structured enterprise software development environments.

PROFESSIONAL EXPERIENCE

Frontend Developer

Ithaca Srl | Mar 2025 - Present

- Designed and developed responsive web application components using React.js, React Redux, JavaScript, Bootstrap and MapLibre GL JS.
- Integrated REST APIs, WMS services and GeoJSON datasets into interactive, data-driven user interfaces.
- Collaborated with project managers, clients, backend developers and external partners to translate requirements and mockups into functional web applications.
- Improved UI performance, cross-browser compatibility and maintainability of frontend code.
- Used Git and GitHub for version control, feature development and code delivery.
- Contributed to technical analysis, implementation choices and application documentation.

Frontend Developer

Business Changers | Sept 2023 - Mar 2025

- Developed and maintained frontend modules for the Bandi Online portal of Regione Lombardia, working on public-sector digital services and structured web templates.
- Used JavaScript, HTML, CSS and SQL to implement, adapt and debug tender-related application flows.
- Worked on data querying and manipulation activities to support application logic and content management.
- Collaborated with internal teams to deliver functional updates according to requirements and deadlines.
- Gained experience working on structured, process-driven applications with attention to reliability and maintainability.

Environmental Engineer

Italambiente Srl | Apr 2022 - Mar 2023

- Reviewed risk assessment documents, environmental self-monitoring plans, emergency plans, acoustic impact assessments and site layouts.
- Handled environmental permit update processes and monitored site environmental analyses.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React.js, React Redux, Bootstrap
Data & Integration	REST APIs, SQL, GeoJSON, WMS services, UX/UI, API integration
Tools & Workflow	Git, GitHub, VS Code, MS Office, technical documentation
Currently strengthening	TypeScript, Angular and Flutter fundamentals, Node.js/Express, C#, ASP.NET MVC, Entity Framework, LINQ

RELEVANT PROJECTS

- **Interactive WebGIS platforms:** Developed web interfaces for geospatial data visualization, integrating external services (Geoportale Piemonte, ICCD, Copernicus, etc...), map layers, API responses and user-driven filtering systems.
Examples: **HVT** - hvt.ithaca.earth; **ALIANTE** - aliante.ithaca.earth; **PARADIGMA** - paradigma.ithaca.earth.
- **React and SQL personal applications:** Built personal web applications using React, Node.js and SQLite, including CRUD operations, state management and API-based data flow.
Examples: **PLANORA** - github.com/marcofalotico/ristrutturazione-budget-platform; **Ithachess** - github.com/marcofalotico/Ithachess.
- **Personal portfolio:** Personal portfolio developed to showcase frontend projects, UI implementation and responsive design. marcofalotico.netlify.app

EDUCATION

Polytechnic University of Turin

2022 - Master's Degree in Environmental Engineering, Environmental Data Analysis - Final grade: 94/110

2017 - Bachelor's Degree in Building Engineering
